

CURTAIN WALL SYSTEMS

PONZIO BOND

FIXING METHODS

A light, ventilated façade system consisting of composite panels and mounting profiles and accessories.

- » three panel types:
 - PONZIOBOND PE consisting of a plastic core sandwiched between two aluminium sheets
 - PONZIOBOND FR - fire-retardant panels - the plastic core is mixed with a mineral filling
 - PONZIOBOND A2 - fire-resistant panels - LDPE core with a mineral filling
- » advanced optimisation possibilities due to large panel sizes
- » easy mounting
- » short working time
- » functional and aesthetic - gives architects a wide range of possible applications
- » light, rigid and stable
- » good resistance to weather conditions
- » many different shapes possible
- » wide range of colours available (including wood-like)

Technical parameters

Certification

National Technical Assessment ITB-KOT-2019-0872, 1st edition "PONZIOBOND PE, PONZIOBOND FR, PONZIOBOND A2 composite panels", National Certificate of Constancy of Performance No 020-UWB-2587/W "PONZIOBOND FR and PONZIOBOND A2 composite panels"
